Design

Our own technical support team can help take your [plastic injection moulding](#) project from the earliest concept stages through to full production.

We will advise on all aspects including:

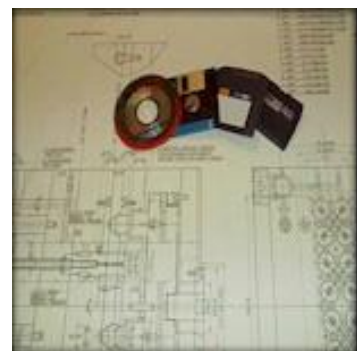

- Strength
- Impact
- Mechanical requirements
- Finish

We can mould any **thermoplastic material** and colour as appropriate.

We will always try to design components to avoid expensive tooling.

3D Models and **prototypes** can be offered where necessary.

Low cost [Injection mould tool design](#) will be offered to obtain moulded product prior to laying down multi-cavity tooling.

You can either call, click, or visit us to find out more information.
