## Ultrasonic Welding

Ultrasonic welding has proved an excellent alternative to using adhesives, heat staking or use of fasteners.

We can advise on special design of components to facilitate use of **the ultrasonic welding** technique.

Metal inserts can also be ultrasonically inserted into the plastic component.

We can provide special tooling required for ultrasonic welding, however, on some applications, standard Tooling may also be used.

### Ultrasonic Welder

We can advise on special design of components to facilitate use of this technique.

You can either call, click, or visit us to find out more information.
